X-PROG 3 Key Programmer

X-PROG3 car immobilizer programmer is another anti-theft product launched after X-431G. It is a powerful chip reading/writing device. It is mainly used for reading and writing data of car key chips, including reading/writing EEPROM, reading/writing on-board MCU, Mercedes-Benz infrared keys, generating special keys, reading BMW engine INS

code, reading/writing BMW CAS4+/FEM chips. It can be used together with a variety of X-431 products without binding. It is flexible, stable, reliable, and suitable for professional users such as automotive electronics industry/locksmith/repair shop. .

Product Features:

- Compatible with X-431 series diagnostic scanners, X-PROG 3 enables reading/writing EEPROM, on-board MCU and BMW CAS4+/FEM chips, Mercedes-Benz infrared keys, generating special keys, reading BMW engine INS code.
- Supported brands: VW, AUDI, SKODA, SEAT, BMW, MERCEDES-BENZ, TOYOTA, etc. More models continue to be updated.

Address: 5B, Extension, First floor, APIIC, IE, Prashanthi Nagar, Kukatpally, **Hyderabad-500072**

- Supported systems: Automatic Transmission, Instrument System, CAS, Body System, Lock System, etc.
- Compatible with: X-431 PRO GT, X-431 PRO V4.0, X-431 PRO 3 V4.0, X-431 PRO 5, X-431 PAD III V2.0, X-431 PAD V, X-431 PAD VII

Interface	DB26, DB15
Input voltage	DC12V
Input current	500mA
Working temperature	0-50°C
Storage temperature	-20-70°C

Address: 5B, Extension, First floor, APIIC, IE, Prashanthi Nagar, Kukatpally, **Hyderabad-500072**

Appearance Introduction:

Name	Description
Car Key Slot	Used to place the car key to perform the key matching function
DB26	Used to connect to each anti-theft harness.
Benz key infrared slot	Used to place the Mercedes-Benz infrared key to perform the key matching function
Car key chip hole	Used to place the key chip to perform the key matching function
Status indicator lamp	Power supply indicator lamp
DIY slot	Used to connect the anti-theft ECU pin through the cable to read and write data
Locker	Used to install chip burning socket to read and write EEPROM or MCU data
DC12V power supply	Used to connect to the DC12 power supply
DB15	Used to connect to the main harness

Address: 5B, Extension, First floor, APIIC, IE, Prashanthi Nagar, Kukatpally, **Hyderabad-500072**

Function Advantage

Read/write EEPROM	Read/write keys
Read/write MCU	Read BMW engine ISN code
Mercedes-Benz keys	Read/write BMW CAS4+ and FEM chips
Key simulator	Read/write Audi fifth-generation steering column chips
VW Fourth-generation Dump Mode All Keys Lost	Read OBD MED17 engine
Read engine in BENCH mode	Replace VW fourth-generation UDS engine
Read engine in Boot mode	Replace VW MQB engine, gearbox, steering column lock
VW Fourth-generation Enumeration All Keys Lost	Read/write Mercedes-Benz engine and gearbox data
Read gearbox data	

Uses Operation

Connection method 1: Directly connect to OBD16 for key matching, data reading and writing, etc

Address: 5B, Extension, First floor, APIIC, IE, Prashanthi Nagar, Kukatpally, **Hyderabad-500072**

Connection method 2: Place the anti-theft EEPROM or MCU chip in the chip burning socket, and then insert the chip burning socket into the slot of the immobilizer programmer locker and lock it to realize the data interaction between the IC anti-theft chip and the diagnostic host

Connection method 3: After removing the ECU from the car, connect the anti-theft ECU pin to the DIY slot of the immobilizer programmer through the cable to realize the data interaction between the anti-theft ECU and the diagnostic host.

Supported Brands

Supported brands: VW, Audi, Skoda, SEAT, BMW, Mercedes-Benz, Toyota, and more models continue to be updated...

Supported systems: Engine system, automatic transmission, instrument system, CAS, body system, lock system, etc.

NOTE: VW anti-theft systems: second and third generation anti-theft system, fourth generation anti-theft system, MQB system, fifth generation anti-theft system, fourth generation EZS/KESSY, Johnson MQB system, second and third generation anti-theft system (VDO66), fourth generation comfort computer

It supports common mainstream ECU MCU manufacturers, with more than 1,000 product models, and they are continuously being updated.
